ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.*

(54) Title: A METHOD AND AN APPARATUS FOR MONITORING THE AMOUNT OF EROSION IN THE WEARING PARTS
OF A CRUSHER

(57) Abstract: A method and apparatus are disclosed for monitoring the amount of erosion in the wearing parts of a crusher, in
which method the wearing of the crusher is provided with a wear sensor that issues a signal to the crusher's automatic control system
as erosion in the wearing part reaches a predetermined depth. Upon receiving the signal, the control system initiates predetermined
actions, such as an alarm, stopping the crusher and/or ordering of a spare part. Information on the amount of erosion in a wearing
part is transmitted wirelessly to the automatic control system.
